Note: Style and product availability may vary slightly from those shown in this catalog due to material availability and/or improvements to our designs. Specifications are subject to change without notice. Finger joint technique is used in some of our molding and decorative items, which is acceptable in industry standard. Natural variations of wood make the possibility of the finger joints visible. There is 1/4" to 1/2" deviation on all vanity cabinets. Check with your sales representative for product specification before planning your projects.

Note: Style and product availability may vary slightly from those shown in this catalog due to material availability and/or improvements to our designs. Specifications are subject to change without notice. Finger joint technique is used in some of our molding and decorative items, which is acceptable in industry standard. Natural variations of wood make the possibility of the finger joints visible. There is 1/4" to 1/2" deviation on all vanity cabinets. Check with your sales representative for product specification before planning your projects.
